

## POTATO PRINTS

**What you'll need:** potatoes, permanent markers, knife (adults only), thick liquid tempera paint, small paintbrushes, pie tins, and paper

### Instructions:

1. Cut the potatoes in half.
2. With a Sharpie, draw a simple nature design on each half, such as a tree or a leaf.
3. With a parent, on each half, use an X-Acto knife to carve away the potato **around** the design. The raised area will create the printed image. Make as many stamps as you want!
4. Pour the paint into the pie tins

or paper plates, dip the potato, and stamp away on paper. Maybe you want to make placemats for your family!
